Education

Master of Computer Applications   Jharkhand University of Technology, Ranchi

Objective

I am a **React.js Developer** with **more than 1 year** of experience, skilled in **React.js, JavaScript, Node, Express**, and dedicated to building **interactive**, **user-friendly**, and **scalable** web applications. With a strong understanding of **JavaScript, React.js, Node, and Express**, I am actively seeking a role as a **Frontend developer** where I can contribute my skills and deliver efficient solutions.

Technical Skills

- **Programming Frameworks:** JavaScript/TypeScript, React.js (Hooks, Context API, Redux, React Router), Next.js, Express, Node, Dino, Bun, Google Search Console, Mongoose, CI/CD, Pipeline, SQL (MySQL / PostgreSQL), NoSQL
- **Web Technologies:** HTML, CSS
- **Version Control Tools:** Git, GitHub
- **Other Skills:** Data Structures and Algorithms

Work Experience

July 2024 – Present   **React.js Developer**   **Hania Forex Pvt Ltd**

Mughlai Restaurant Web App   Industrial project

- Build projects on React and managed multiple React projects, with mainly focus on **API integration and UI/UX design**.
- Used **React.js** for the frontend, **Redux** for state management, and **Firebase** for authentication.
- Implemented **React Router** for navigation and **GitHub** for version control.
- Built an **admin panel** enabling admins to **add, edit, and update categories**, which reflects instantly on the user side.
- Implemented **real-time order status updates** (Preparing, Delivered, or Failed) sent to users.
- Admins can **view and manage orders placed by customers**. (**CLICK ME on Desktop**).

DM Coding School   Industrial project

- A responsive web application **DM Coding School Website** built with **React.js** and **Context API**.
- Implemented **dynamic course listing** and **student enrollment system**.
- Designed **reusable components** ensuring scalability and clean architecture.
- Enhanced **UI/UX** with interactive features like **Apply Now** and fee structure. (**CLICK ME on Desktop**)

Mail Box Client   Personal Project

- Developed a **mailbox client application** that allows users to **send and receive emails** from other registered users.
- Implemented **unread message tracking** to display the total number of unread messages.
- Used **React.js** for UI, **Redux** for state management, **Firebase** for data storage, and **GitHub** for version control. (**CLICK ME on Desktop**).

Expense Tracker   Personal Project

- Created an **expense tracker application** where users can **add, delete, and update expenses**.
- Introduced a **premium feature** that includes **dark mode** and **expense download functionality**.
- Used **React.js** for frontend development, **Redux** for state management, **Firebase** for authentication and data storage, and **GitHub** for version control. (**CLICK ME on Desktop**).
